

MARTIN MAQ[®]

MAQUINARIA HORTICOLA
VEGETABLE HANDLING SYSTEMS

WASHING MACHINE LBI 2MC

M

Machinery manufactured in stainless steel with high quality standards, providing the best finish and resistance to the product.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality and design in all our machines to extend their life and give a solution to your needs each time.

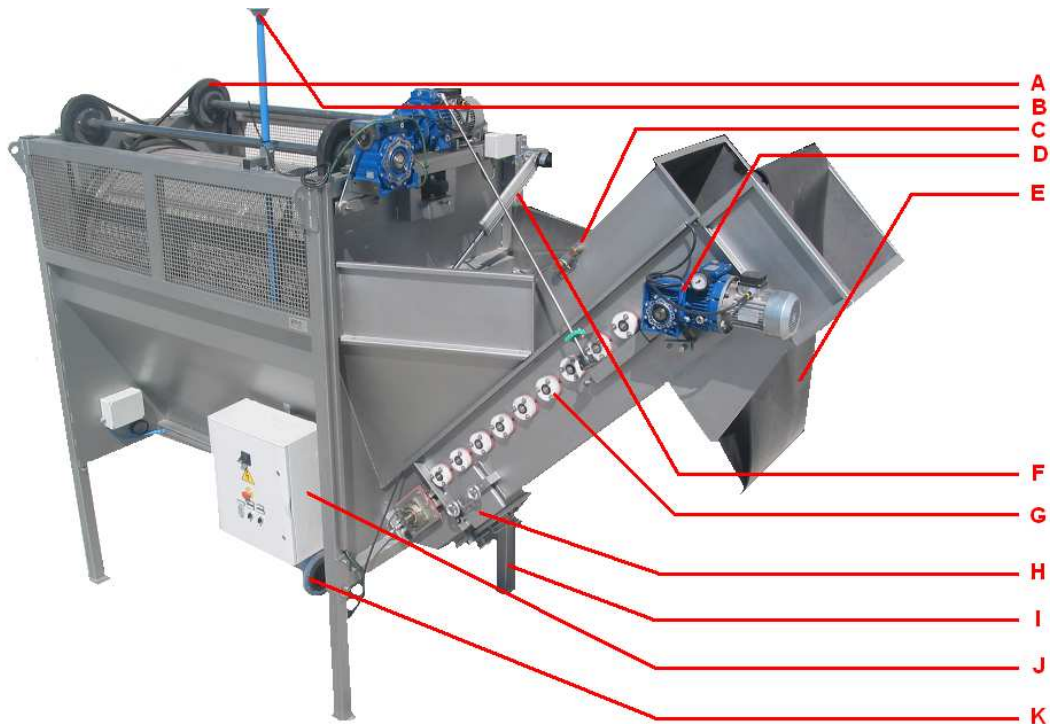

LBI 2MC washer is the perfect machine to wash carrots, potatoes, parsnips, turnips, etc. achieving an optimum washed product, with a processing capacity of up to 15 tons / hour. It has a compac design.

This machine has a self-centered drum system, cleaning lock-gates, water level detector, pneumatic valve that allows the correct flow for mud disposal, adjustable opening exit lock-gate to control the amount of product coming out of the washer and electronic speed adjusters on the drum and on the exit elevating conveyor, that achieve a good cleaning of the product at any working speed and output needed.

IMPORTANT PARTS OF THE MACHINE

A: V-belt transmission system.

B: Water level detector to prevent overflows and control water consumption.

C: Water sprays on the elevating conveyor for rinsing the product.

D: Motors on the elevating conveyor and drum have mechanical speed adjusters to control washing speed and amount of product being processed.

E: Anti-acid bib that prevents damage to the product when leaving the machine.

F: The opening of the exit lock-gate on the drum is controlled by an electric adjuster.

G: Specially coated bearings to avoid wetting.

H: Cleaning lock-gates.

I: Adjustable height (1m)

J: Electric board included.

K: Pneumatic valve to dispose of the mud in the drum.

TECHNICAL SPECIFICATIONS

WASHING MACHINE LBI 2MC	Length: 4.776 mm Width: 1.694 mm Height: 2.960 mm
<p>The image contains three technical drawings of the LBI 2MC washing machine. The top-left drawing is a front view showing the machine's profile with a length dimension of 4.776 mm. The top-right drawing is a side view showing the machine's width with a dimension of 1.694 mm. The bottom drawing is a top-down view showing the machine's height with a dimension of 2.960 mm. The drawings illustrate the internal drum, conveyor system, and various mechanical components.</p>	

- Motors with mechanical adjustable speed.
- Power: 2,55 KW.
- Perforated elevating conveyor that filters the water not damaging the product.
- Water spray's rinsing system on the elevating conveyor.
- Water level detector.
- Automatic pneumatic valve to eliminate the water from the mud.
- Robust machine, built in stainless steel.
- Cleaning and inspection lock-gates.
- V-belt transmission system and mechanical drum fasteners.
- The opening of the exit lock-gate on the drum is controlled by an electric adjuster
- Drum diameter: 1.090 mm, length: 2.000 mm.
- Output: Up to 15 t/h.
- Potatoes, carrots, parsnips, turnips, celeriac, etc..
- Weight: 1.800 Kg.

At MARTINMAQ we know that you take great care when cultivating a product.

We know that this requires much effort and dedication. This is why we always place all our efforts in designing and manufacturing machines that will help you process your product efficiently, giving it the best possible finish.

We build all our machines to the highest of quality standards, making maintenance very easy and extending the machine's working life.

We have, at your disposal, an after-sales technical team that will assist you with any doubts that you may have during use and will inform you about how to care for your machine to extend its working life and keep maintenance to its lowest.
