

MARTIN MAQ[®]

MAQUINARIA HORTICOLA
VEGETABLE HANDLING SYSTEMS

DOUBLE BIG-SACK FILLING SYSTEM - BIG SACK 2

M

Machinery manufactured in stainless steel following the best quality standards, providing the best finish and resistance.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality, design and efficiency in all our machines to extend their working life and make your work as easy as possible.

This **MARTIN MAQ Double Sack Filler** is designed for carrots, potatoes, etc. being able to fill the sacks alternatively, saving time
Capacity of up to 20 t/h.

The machine has two lower platforms which support the sacks at all times during filling avoiding damage to the product.

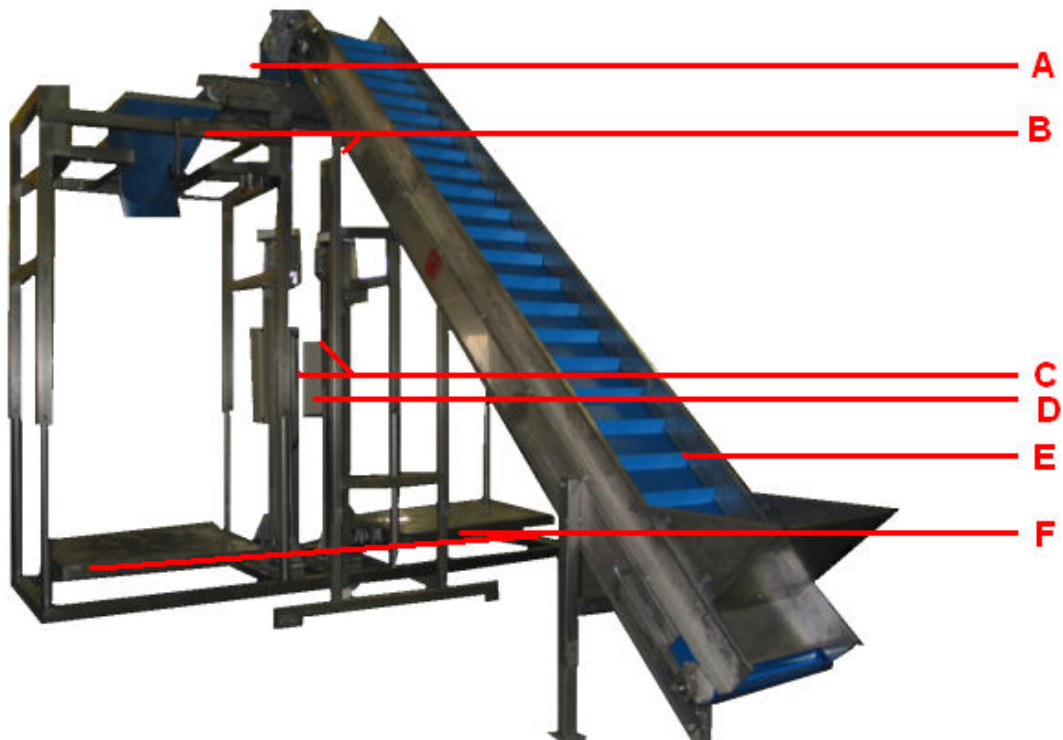

The support from where the sack hangs can be taken out, making this easy and saving time when placing a new sack on it or taking off the one already full.

The machine is completely automatic, with an automated filling system that controls the level of the product in the sack, this way avoiding any damage.

A fork-lift truck is needed to place on and unload the sack from the filler.

IMPORTANT PARTS OF THE MACHINE

- A:** Two product detectors - Makes easy the automatic functioning.
- B:** Two removable supports for placing and unloading the sack with a “cushion fall”.
- C:** Two sack support devices that hold the sack on its way down.
- D:** Electric board included.
- E:** Elevating conveyor included and adequate for the capacity required.
- F:** Two “slowing down” platform (padded) that avoids damage to the product.

TECHNICAL SPECIFICATIONS

DOUBLE BIG-SACK FILLER BIG-SACK 2	Length: 3.986 mm Width: 4.000 mm Height: 3.404 mm

- Elevating conveyor with PVC belt included.
