

**WASHER FOR BANANAS WITH
FUNGICIDE APPLICATION SYSTEM LPF 1250**

M

Machinery manufactured in stainless steel following the best quality standards, providing the best finish and resistance.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality, design and efficiency in all our machines to extend their working life and make your work as easy as possible.

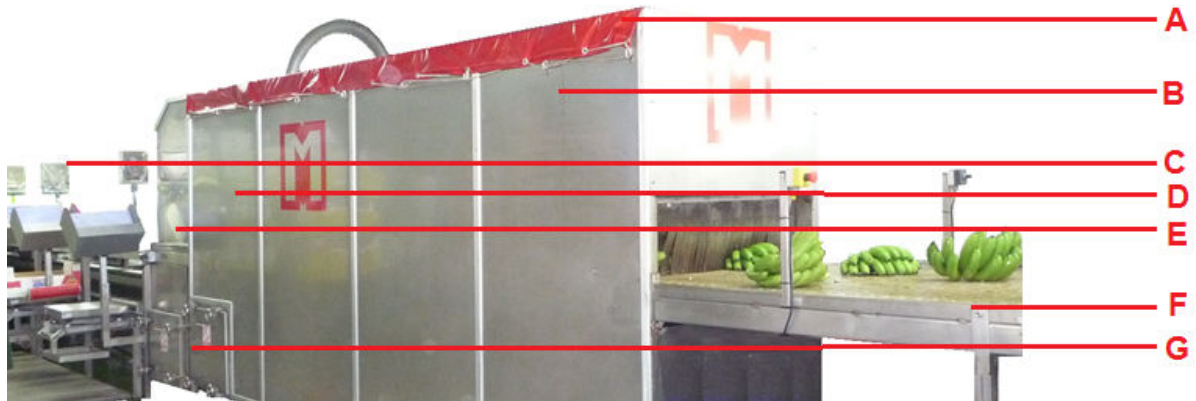

This washer for bananas is the most innovating machine in the market for washing banana bunches.

This machine will eliminate all the dirt that the bunches may carry, even any small particles that could be stuck onto the skin.

The capacity of the machine can be up to 8000 K/h. This capacity will determine the length of the conveyor (not included).

The washer will first proceed with a first wash, then a rinse, dry and finally, sprays fungicide on the product, all these actions within the washer. This process reduces the use of space (one machine only) and will save time. Innovating water recycling system.

IMPORTANT PARTS OF THE MACHINE

A: Cover to avoid splashing.

B: Innovating water sprays washing system.

C: OPTION: Exit with packing and weighing area.

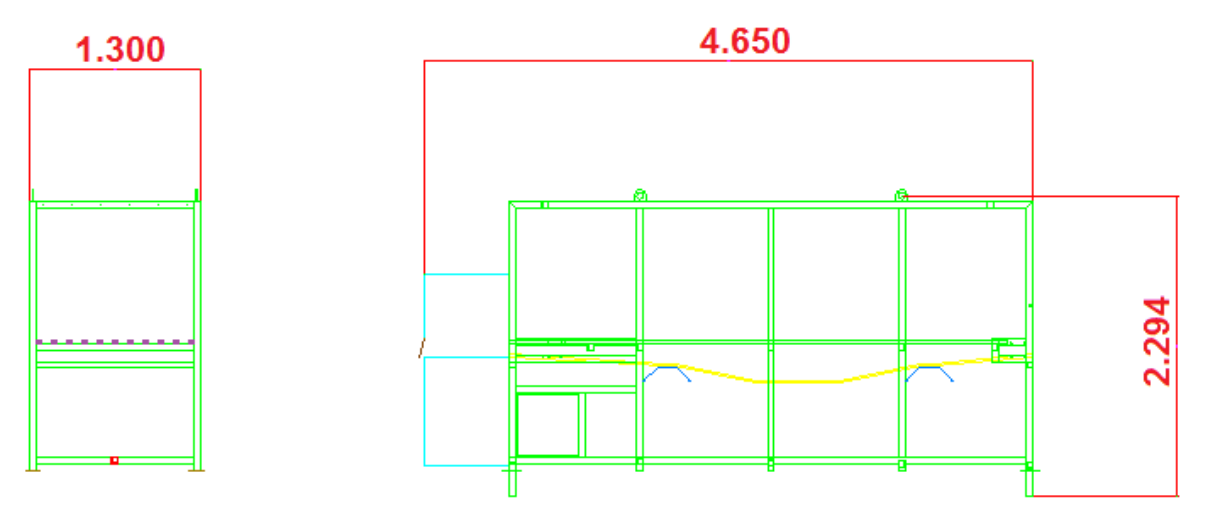

D: Built entirely in stainless steel.

E: Rinsing, drying and disinfection's area.

F: OPTION: Entry with inspection tables, waste conveyors, speed adjusters, safety systems, etc.

G: Water accumulation, access and cleaning lock-gates area.

ESPECIFICACIONES TÉCNICAS

WASHER FOR BANANAS WITH FUNGICIDE APPLICATION SYSTEM LPF 1250	L: 9.915 mm W: 2.200 mm H: 2.146 mm
 The technical drawing shows two views of the banana washer. The front view on the left is a simple rectangular frame with a height dimension of 1.300. The side view on the right shows a more complex structure with a total length of 4.650 and a height of 2.294. The side view includes a conveyor system with rollers and a water spray system. A yellow curved line indicates the path of the bananas through the washer. Blue lines represent the water spray system. The entire drawing is enclosed in a red border.	

- Closed water circuit with pump included.
- Fungicide and water pumps included.
- Water tank capacity: 3.5 m3.
- Modular conveyor not included. We manufacture it depending of each customer.
- Top cover.
- Specially designed to get the best cleaning of the bananas on all sides.
- CE marking.
- Stainless Steel made.
- Water level detector to Project the pumps.
- Water filter.
- Security system in the water entry to avoid waste of water.
- Total power: Depending of the customer.
- Amount of fungicide calculated for each customer.
- Exclusive drying system of the product.
- Exclusive rinsing system of the product.
- Very low water consumption.
- Weekly replenishment of the fungicide to save fungicide and time.

Please, ask for our complete processing lines.

At **MARTIN MAQ** we know that you take great care of your product.

We know that this requires much effort and dedication. This is why we always place all our efforts in designing and manufacturing machines that will help you process your product efficiently, giving it the best possible finish.

We build all our machines to the highest of quality standards, making maintenance very easy and extending the machine's working life.

We have, at your disposal, an after-sales technical team that will assist you with any doubts that you may have during use and will inform you about how to care for your machine and keep maintenance as low as possible.
