

ELIMINATION SYSTEM FOR SOIL AND LEAVES METH 815

M

Machinery manufactured in stainless steel following the best quality standards, providing the best finish and resistance.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality, design and efficiency in all our machines to extend their working life and make your work as easy as possible.

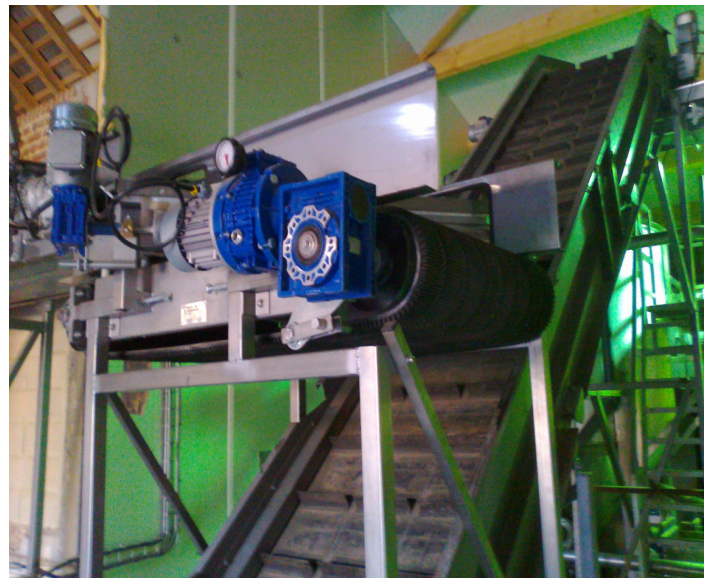

The **Martin Maq Elimination System for soil and Leaves MEHT 815** takes care of disposing of leaves and loose soil (in the case of potatoes), etc ... and it is essential to eliminate before they reach the washer, polisher or grader.

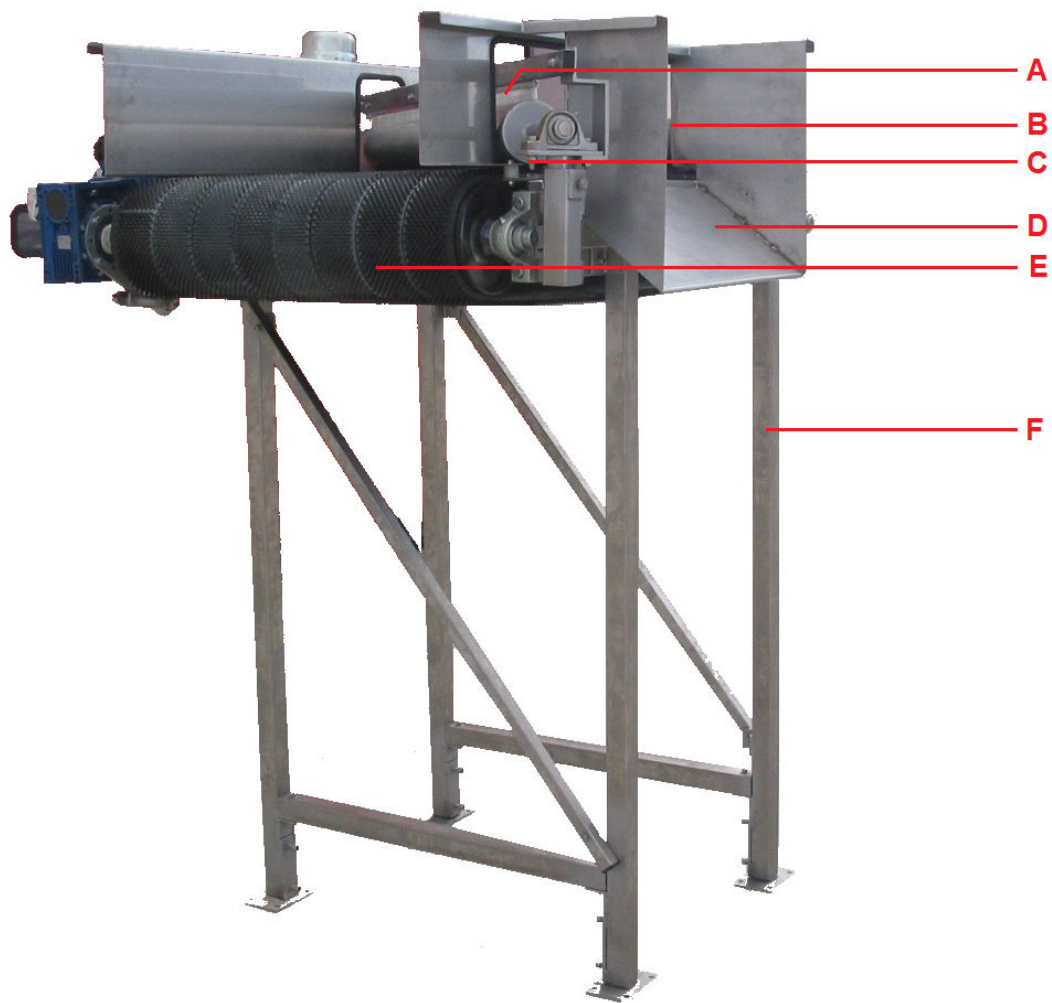

With a strong structure and very easy to use, this small waste disposal system can process up to 10 t/h and eliminate practically all small waste, even the smallest.

It is adjustable in height and inclination to be able to adapt to the different needs and type of product in a very easy way.

NOTE: This machine will NOT eliminate stones, for which we suggest a destoner is placed behind, should the customer wish to do so.

IM PORTANT PARTS OF THE MACHINE

A: Deflector cleaning brush.

B: Shock absorber in the entry of the machine.

C: Rotating deflector.

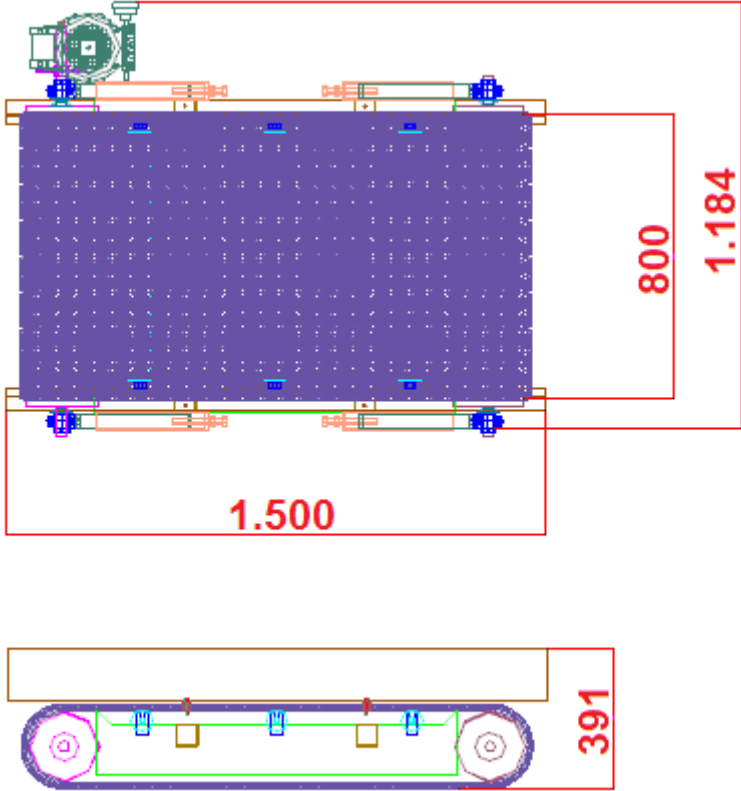

D: Exit hopper.

E: Pintle Belt, specially designed for these functions.

F: Adjustable legs.
