

SACK TIPPER VOLSACK 2018

M

Machinery manufactured in stainless steel following the best quality standards, providing the best finish and resistance.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality, design and efficiency in all our machines to extend their working life and make your work as easy as possible.

The **MARTIN MAQ SACK TIPPER VOLSACK 2018** is designed to tip sacks and boxes supported by a pallet of up to 2.200 mm tall. The maximum weight it can tip is 2.000 Kg.

Parts of the machine where the product is in contact are made of stainless steel, being the main frame made of highly resistant carbon steel.

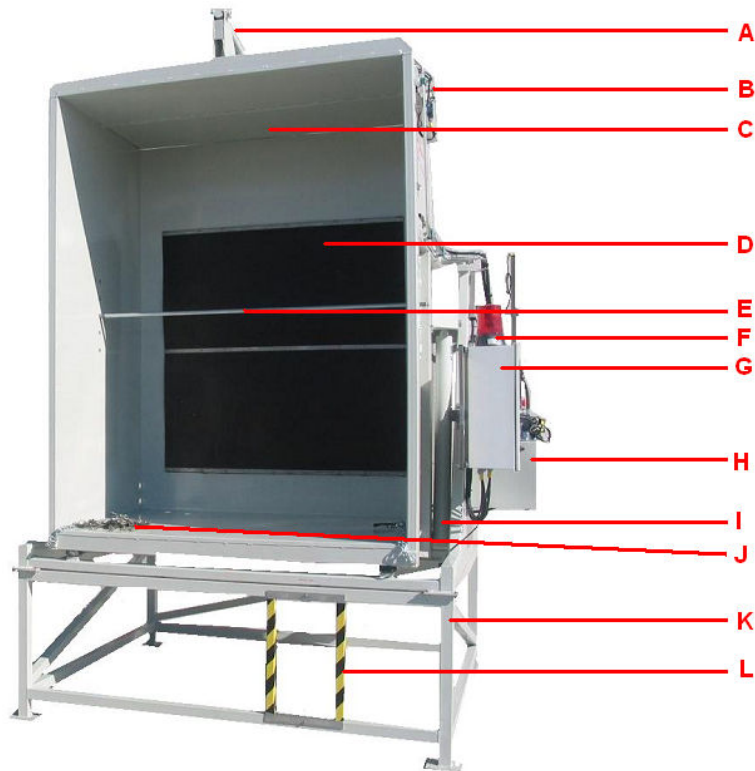

Incorporated are the hydraulic system, the electric board and all the necessary elements for the machine to work correctly.

At the same time, it has protection barriers started with a remote control system, this way following all current safety rules and regulations.

We can also provide the elevating supports to place the machine adequately. The tipper has a cover that prevents the product being damaged.

IMPORTANT PARTS OF THE MACHINE

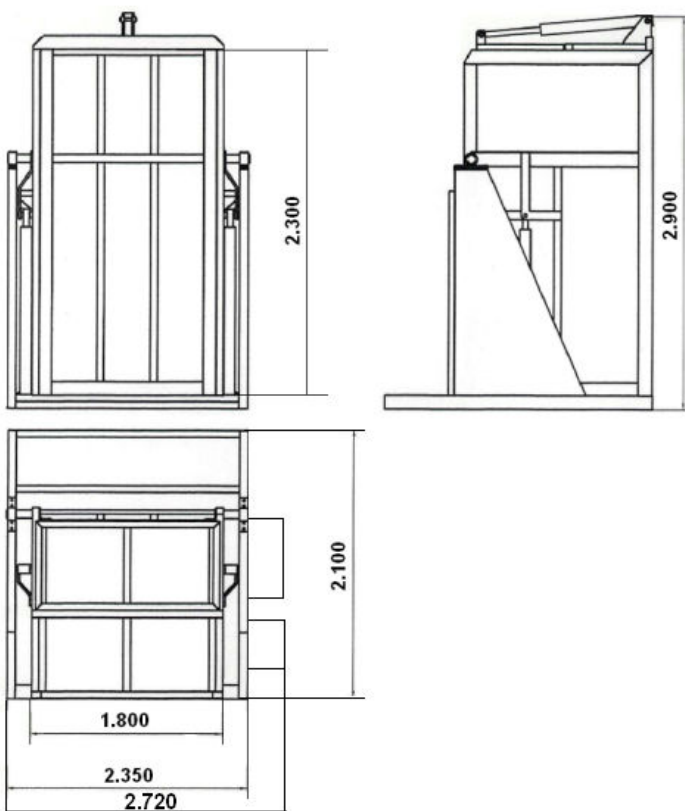

- A:** Start button to open and close upper lid.
- B:** End of tipping action detectors and photocells needed for continuous operation (option, depending on need).
- C:** Cover that keeps the product in place during tipping.
- D:** Non-slip rubber sheet that prevents the sack from slipping.
- E:** Support bar for boxes with different heights.
- F:** Light that indicates the machines is starting.
- G:** Electric board included.
- H:** Hydraulic system to move cylinders (oil content).
- I:** Hydraulic cylindrs that give movement to the tipper.
- J:** Camping system for the sack or pallet included, that avoid them from falling.
- K:** Strong and sturdy carbon steel frame with cover made of stainless steel.
- L:** The tipper has a presence detector that activates by itself. This is the gap where the fork lift truck driver can place the fork(s) so the machine starts to tip without having to leave the truck.

Side protection mesh to avoid danger during tipping.

TECHNICAL SPECIFICATIONS

SACK TIPPER VOLSACK 2018	Length: 2.100 mm Width: 2.720 mm Height: 2.900 mm
	

- Strong and resistant carbon steel structure with box covered in stainless steel. (Elevating supports to place the machine adequately optional)
- Designed to tip sacks of up to 2.200 mm high and 1.750 mm wide.
- Sistema de apoyo superior de cajón regulable en altura para distintos tipos de cajones.
- Total tipping time is 5 minutes. Maximum capacity: 15 to 20 T/h.
- The maximum weight it can tip is 2.000 Kg.
- Hydraulics and electric board included.
- Side protection mesh following current safety rules and regulations.
- End of tipping action detector and photocells needed for continuous operation (manual or automated)
- Power: 2.2 KW.
- Weight: 1.600 Kg.
- Presence detector to make starting easy.
- CE Marking
- Adequate for boxes (carrots, potatoes, turnips, onions, parsnips,..)

At **MARTIN MAQ** we know that you take great care of your product.

We know that this requires much effort and dedication. This is why we always place all our efforts in designing and manufacturing machines that will help you process your product efficiently, giving it the best possible finish.

We build all our machines to the highest of quality standards, making maintenance very easy and extending the machine's working life.

We have, at your disposal, an after-sales technical team that will assist you with any doubts that you may have during use and will inform you about how to care for your machine and keep maintenance as low as possible.
