

RECYCLING AND FILTERING TANK DERE 1014

M

Machinery manufactured in stainless steel following the best quality standards, providing the best finish and resistance.

M

More than 80 types of machines for processing all types of vegetables such as potatoes, carrots and fruit, unique design. Do not settle for mere copies.

A

Aadjustable in length, width and height with numerous sizes and designs to always provide the right solution to your needs.

Q

Quality, design and efficiency in all our machines to extend their working life and make your work as easy as possible.

The **MARTIN MAQ Recycling and Filtering Tank DERE 1014** is used to accumulate water from the washer, polisher, etc. to its later use.

Due to its design we can fix to this tank, 2, 3 or 4 deposits in line, to make the filtering completely effective with different size filters.

Filtering capacity between 15 to 150 m³ per hour, depending on the number of deposits, deposits which are accessible with a fork lift truck to remove them from under the machine and dispose of the mud accumulated.

A water pump can be installed inside the deposit to move the water.

IMPORTANT PARTS OF THE MACHINE

A: Stainless steel deposit.

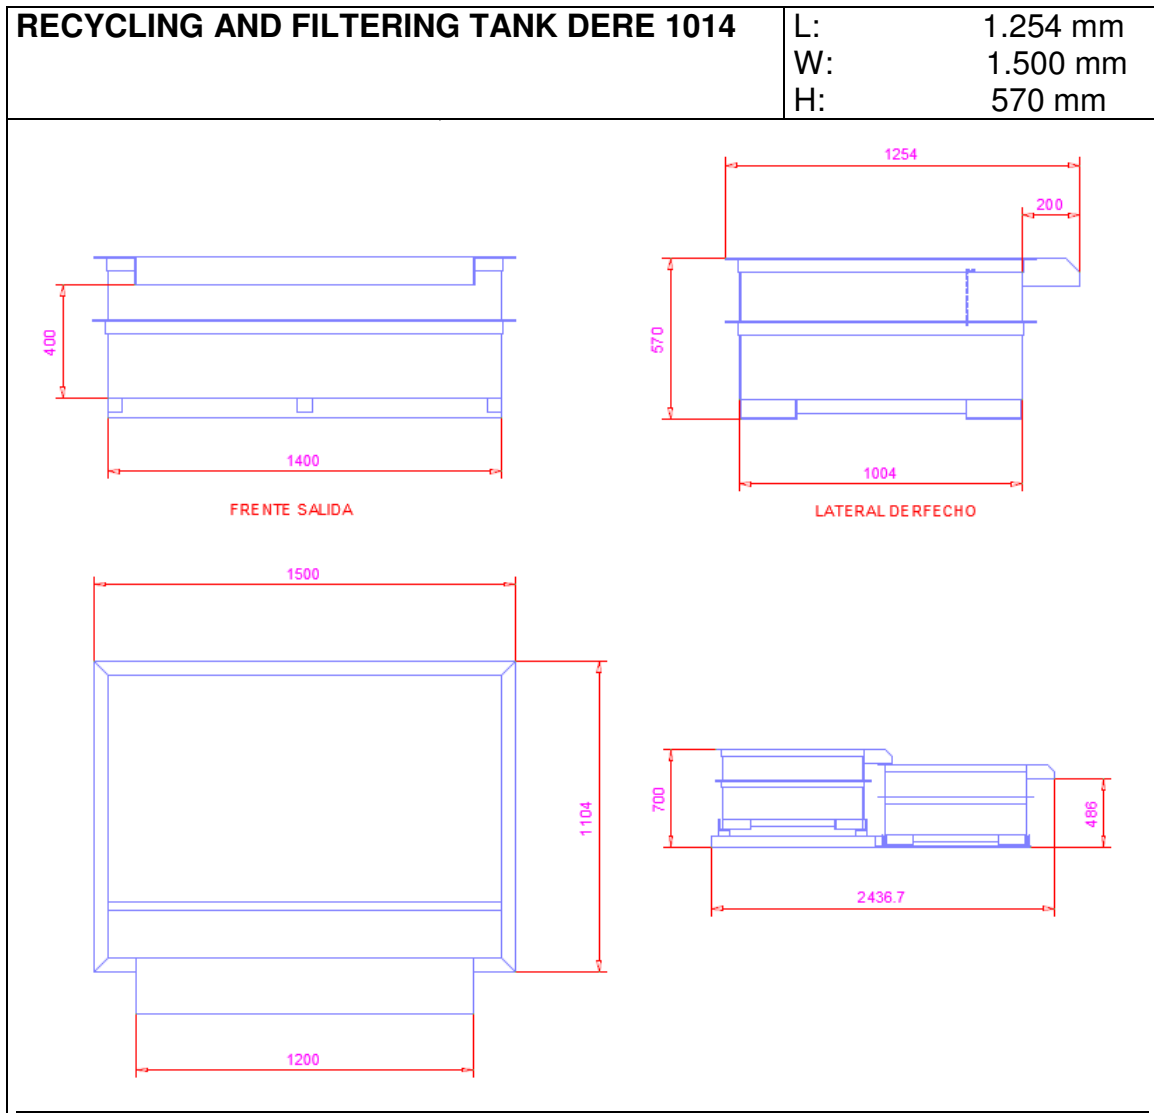

B: Different size filters.

C: Water exit.

D: Deposit stand. Accessible with a fork lift truck.

E: Water exit flow.
