

Our range of MSB series band selection tables are the right machines for the selection of fresh vegetables and other products in the most delicate way possible.

They are totally constructed in stainless steel with smooth strip of alimentary PVC.

They have channels for the collection of debris and the band rolls on rotating rollers.

They are suitable for potatoes, carrots, turnips, etc., both dry and wet.

Its special design makes them easy to assemble, lightweight construction and very high strength. They have belt tensioners at the entrance and at the exit.

We have models of all the necessary lengths and widths, thus covering any of your needs.

The power of the engine is adapted to the needs of the client, thus optimizing the electrical consumption, the maintenance and the investment.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

Main features

- Robust and sturdy structure made of stainless steel.
