

Bigsack 1

Bigsack 2

Our range of BS series big bag fillers are suitable machines to fill sacks of carrots, potatoes, parsnips, turnips, apionabos, etc.

They have removable supports to facilitate the hanging and pick up the big bags with less difficulty and in the shortest possible time with a forklift truck.

The filling is fully automatic controlled by an automaton and have lower platforms where the support is supported during filling so that the product is not damaged.

Our wide range of models allows us to offer you the system that best suits your needs, with the tightest investment, which guarantees a fast return on investment.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hopes, hoppers, graders, washers, water recycling systems, etc.
