

Our PSM series range of big bag supports are a very low cost adjustable bags supports.

They are made of stainless steel, are highly resistant and do not have any maintenance.

The use of these bag holders is extremely simple: the forklift truck is used to position the bags in the supports.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

## General features

- Robust structure in stainless steel.
- Suitable for bags of carrots, potatoes, parsnips, onions, turnips, etc.
