

The MC series brushing tables are composed of a series of axes with brushes and are specially designed to brush potatoes, onions, etc.

It is the right machine when the productions are less than 5 t/h, and when the dry brushing is needed and brushing requirements are not too demanding.

There are different types of brushes, depending on the type of product that has to be treated.

The brushes can also be set to rotate at different speeds allowing you to perform from a gentle cleaning to a more vigorous one.

It has a protective canvas that prevents the rising dust or leaves (in case of onions) during use.

It is made of stainless steel, it is very low maintenance, and economical due to its special design.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.
