

Our range of MSB series conveyor sorting tables are the right machines for sorting fresh vegetables and other products in the most delicate way.

They are totally made of stainless steel with a smooth edible PVC band.

Channels can be optionally installed for waste collection.

They are suitable for potatoes, carrots, turnips, etc. both dry and wet.

Their special design makes them easy to assemble, light in construction and very high resistance. They have band tensioners at the entrance and exit.

We have models to cover any of your needs.

The engine power is adapted to the customer's needs, thus optimizing electricity consumption, maintenance and investment.

As a complement to this system, we offer a wide catalog of options such as dump trucks, hoppers, filter systems, multifunction vibrating tables, washing machines, calibrators, and a long etc.

General Characteristics

- Robust and resistant stainless-steel structure.
- PVC alimentary strip suitable for any type of fruit and vegetable product, both dry and wet, with high resistance and durability.
- Belt tensioning system on both sides of the conveyor.
- Waste collection channel.
- Variable speed drive (optional)
- Low electricity consumption.
- Easy maintenance and cleaning.
- CE marked
