

The desander DES 2550 series are the perfect solution to remove sand and mud from the water of production lines.

It is suitable for flows up to 25 m<sup>3</sup> / h, obtaining optimum results.

Due to its unique design, the water comes out of the top of the tank, decanting the soil and mud in the bottom, where the internal auger will easily extract it.

Combining it with our BSS-series particle filter forms a perfect recycling system.

It is made entirely of stainless steel and has a very low maintenance.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

## General features

- Robust structure in stainless steel.
- Solid extraction system using auger.
- High capacity water tank.
- Tank lid to prevent splashing and dropping of objects into the machine.
- Gate for inspection and maintenance.
- Wrench for quick emptying of the tank.
- Very low maintenance.
- Adjustable feet in height.
- CE marking.

## Características técnicas

	Maximun capacity (*)	Tank capacity	Size length, wide, heigth	Kw	Weight
<b>DES 2550</b>	25 m <sup>3</sup> /h	1 m <sup>3</sup>	5.675x2.000x2.910 mm	1,5 Kw	600 Kg

(\*) – Depending on the dirt of the water.
