

The DES 2550 desanders range are the perfect solution for removing water sand and mud from production lines.

It is suitable for flow rates up to 25 m³ / h, obtaining optimal results.

Due to its unique design, the water comes out of the upper part of the tank, decanting the earth and mud at the bottom, where the internal auger will easily extract it.

Combined with our BSS series particle filter they form a perfect recycling system.

It is made entirely of stainless steel and has very low maintenance.

As a complement, we offer a wide catalog of options such as tippers, hoppers, conveyors, filtering systems, multifunction vibrating tables, washing machines, calibrators, and much more.

General Characteristics

- Robust structure in stainless steel.
- Solids extraction system.
- Very low maintenance.
- High capacity water tank.
- Tank cover to avoid splashing and falling objects into the machine.
- Manhole cover for inspection and maintenance.
- Valve for quick emptying of the tank.
- Height adjustable legs.
- CE marked.

Technical Data

	Maximum capacity	Capacity	Measurements L, W, H	Power	Weight
DES 2550	25 m ³ /h	1 m ³	5.675x2.000x2.910 mm	1,5 Kw	600 Kg
