Our range of dry receiving hoppers TRI series are ideal for receiving raw material, potatoes, carrots, etc., directly from trucks or dump trucks.

They are completely made of stainless steel and have a rubber band that is very resistant to soil degradation and impurities that may accompany the product at reception point.

The engines integrate a variable speed variator to easily regulate the amount of product that we want to process in the line. They also carry protective bibs to protect the product during its dump in the hopper.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

General features

- Robust structure in stainless steel.
- Specially designed to receive and accumulate product directly from trucks or dump trucks.
- Ribbed rubber band of high resistance.
- Product protection bibs.
- Low power consumption.
- Inspection gates.
- Easy maintenance and cleaning.
- CE marking.
- Optional:
 - Side wall for single side feed.
 - Height adjustable legs.

Tecnical features

	Maximun capacity (*)	Size L, A, A	KW
TRI 6-25	1,6 m ³	2.719x1.960x1.200 mm	0,36 KW
TRI 6-40	2 m ³	4.150x1.500x1.075 mm	0,75 KW
TRI 6-50	2 m ³	4.990x1.500x1.075 mm	0,75 KW
TRI 6-75	4 m ³	7.000x1.315x1.550 mm	1,47 KW
TRI 6-90	4 m ³	8.500x1.315x1.550 mm	1,47 KW
TRI 6-65	13,5 m ³	6.565x2.164x2.100 mm	0,75 KW
TRI 6-85	19 m ³	8.820x2.160x2.175 mm	1,47 KW
