

SP10R

SP16R

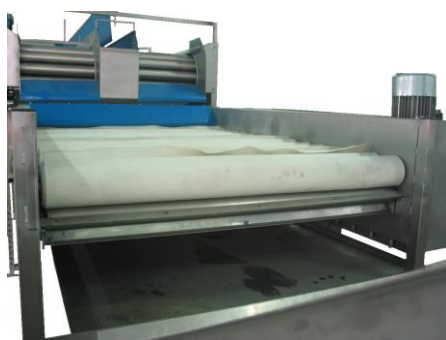

Our range of roller dryers are specially designed to dry potatoes, etc. They are ideal to remove excess of water from the outlet of the washing machine or polisher, improving storage and extending life.

They have a series of squeegee rollers that apply a constant pressure on the absorbent rollers that remove excess water and maximize the drying action and durability of the system.

They are constructed entirely in stainless steel, have great resistance and are very low maintenance.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

General features

- Robust structure in stainless steel.
- Compact and effective design.
- Suitable for potatoes, turnips, etc.
- Product protection bibs at the inlet and outlet of the machine (optional).
- Protective shield of mechanisms.
- Adjustable feet in height and inclination.
- Chain transmission system.
- CE marked.

Tecnical features

	Maximun capacity (*)	Nº of rolles	Size length, wide, heigth (**)	KW
SP 10R	10 t/h	10	1.450x1.430x1.500	0,75 KW
SP 16R12	20 t/h	16	2.300x1.520x1.500	1,10 KW

(*) – Depending on type and variety of the product.

(**) – Other configuration and measures under request.
