

Our range of longitudinal graders CALONG series are suitable systems for longitudinally calibrating accurately, as well as to eliminate small pieces or to align the product correctly to the input of another machine.

They are suitable for carrots, parsnips, etc.

It works by vibration, obtaining an optimum and careful calibration.

It can be accompanied by the conveyors necessary to pick up the different measures after calibration.

They are constructed entirely in stainless steel, have great resistance and very low maintenance.

To complement this system we offer a wide range of options such as dumpers, hoppers, conveyors, filtration systems, multifunction vibrating tables, washing, sorting, etc.

Main features

- Strong structure in stainless steel.
- Valid for carrots, parsnips, etc.
- Vibration calibration system.
- Manual regulation of gauges.
- Protective bibs at the entrance to the machine.
- Regulation of processing speed by a special system of mass regulation in motor-vibrators.
- Dual system of motor vibrators
- CE marking.
- Available options:
 - Product alignment brush.
 - Adjustable feet.
