

Our VCM series of manual tippers have been designed for containers of different sizes in a very simple and economical way.

They are made of stainless steel, are highly resistant and have no maintenance.

The use of this steering wheel is very simple: it uses the forklift to effect the dumping of the container.

Incorporate a standard lifting support that allows the adaptation of the dumpers to your needs.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

Main features

- Robust structure in stainless steel.
- Suitable for carrots, potatoes, parsnips, onions, turnips, etc.
- Upper support system of height adjustable drawer for different types of drawers.
- Without electricity consumption.
- Without maintenance.

Technical features

| | Maximum box size (*) | Maximum load capacity (*) | Size L, A, A (*) | Weight |
