

The wide range of DR series deposits are the perfect solution to recover almost all of the water used in production processes.

Performs filtering sand and mud by decantation, allowing reuse water in your processing line. This way you save water and filter it achieved rootlets, leaves and small pieces of product easily.

Because of its compact design, is possible to couple studied 2, 3 or 4 deposits followed for more effective filtering. Also they allow installing inside a pump to recirculate water.

The tanks are designed to move with a forklift to easily remove the mud and stones that are inside.

Depending on the number of deposits the water filtration capacity may reach up to 150 m³ of water per hour.

They are completely manufactured in stainless steel and have different sizes to suit your needs.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hopes, hoppers, graders, washers, water recycling systems, etc.

Main features

- Made of stainless steel food grade.
- Very low maintenance.
- System with 2, 3 or 4 tanks.
- Particulate filter available in various sizes.
- Guides for forklift.
- CE marked
- Options:
 - Water level detector.
 - Water pump and.

Technical features

	Tank	Size L, W, H (*)	Weight
DR1014	1 m ³	1255x1500x570 mm	150 Kg
DR1520.3	2,5 m ³	2050x1550x850 mm	200 Kg

(*) Other measures under demand.
