

The wide range of deposits of the DRC series are designed to recovery and decant the water from the processing line.

Due to its studied design, the mud from the water tends to go to the background, allowing you to retrieve a more clean water. The decanting mud can be easily cleaned from the bottom.

It's allow to install a pump of water inside to recirculate the water.

They are completely manufactured in stainless steel and have different sizes to suit your needs.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hopes, hoppers, graders, washers, water recycling systems, etc.

## Main features

- Made of stainless steel food grade.
- Very low maintenance.
- Options:
  - Inlet.
  - Adjustable feet.
  - Solenoid valve.
  - Water level detector.
  - Water pump and CE marking.

## Tecnical features

	Tank	Size Ø, A (*)	Weight
<b>DRC 1210</b>	0,65 m <sup>3</sup>	1200x850 mm	150 Kg
<b>DRC 1112</b>	1 m <sup>3</sup>	1150x1200 mm	230 Kg
<b>DRC 2010</b>	1,5 m <sup>3</sup>	2000x1140 mm	290 Kg
