

The DERE + FQH series recovery tank are the perfect solution to install under our polishers and washing machines, recovering almost all the water used during their work.

It performs sand and mud filtration in order to be able to use the filtered water in your processing line.

Therefore, you will be able to filter it from rootlets, leaves and small pieces of product with ease and reducing water consumption.

It is made entirely of stainless steel, and can be made in different sizes to suit your needs.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.

General features

- Robust structure in stainless steel.
- Valid for polishers, peelers and others machines.
- High capacity tank.
- Pump adapted to the necessary flow in each case.
- Water level detector.
- Very low maintenance.
- CE marked.

Tecnical features

	Tank capacity (*)	Size L, W, H	KW	Weight
DERE+FQH	0,74 m ³	1.000x1.850x900	2 KW	350 Kg
