

Our range of small piece remover VTH series are the right systems to eliminate small pieces, leaves and roots that come with the product from the field.

It is the perfect machine as a previous step like washing machines, polishing machines or gauges.

They are suitable for carrots, parsnips, etc. effectively eliminating small pieces, leaves and roots without damaging the product.

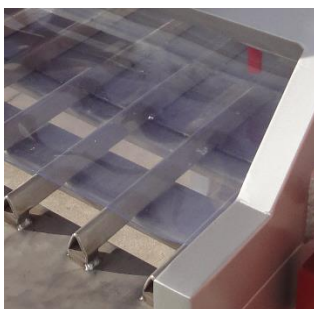

It is made of stainless steel, has a robust structure and very simple and powerful operation.

Due to its small dimensions it can be placed without problems at the outlet of washers and receiving hoppers in water.

It is adjustable in height and inclination to adapt to the needs of the customer and type of product in a very simple way.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.
