

ROMU 530

ROMU10B

ROMU14B

Our range of ROMU series soil removers are the suitable systems to eliminate the soil that is stuck from the field.

They are suitable for potatoes, carrots, celeriac, turnips, onions, etc. Effectively eliminating the soil without damaging the product.

They are constructed entirely in stainless steel, have great resistance and very low maintenance.

It can be provided with a ribbed rubber conveyor that will lead the soil to a drawer or out of your shed for easier and more comfortable pick up. They can also have a shower system for cleaning the rollers.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.
