

Our VET series soil removers are suitable systems to eliminate by vibration soil, coil, dirt and small stones coming from the field.

They are suitable for potatoes, turnips, onions, etc. removing soil, coil, dirt and small stones without damaging the product.

It has anti-vibration systems coupled between the tray and the structure to avoid vibrations in the floor or on the platforms where it is supported.

They are constructed entirely in stainless steel, have great resistance and very low maintenance.

Depending on the product, you can incorporate protective entry and exit bibs.

It can be provided with a ribbed rubber conveyor that will lead the ground to a drawer or out of your ship for easier and more comfortable pick up.

To complement this system, we offer a wide range of conveyors, vibrating multifunction hoppers, hoppers, graders, washers, water recycling systems, etc.
